

Douglas C. Macnair
Vice President, Government Relations
Experimental Aircraft Association

Doug Macnair serves as Vice President of Government Relations for the Experimental Aircraft Association (EAA) in Washington, DC. His primary role involves the oversight and conduct of government relations and advocacy on behalf of more than 170,000 EAA members and the sport and recreational aviation community as a whole.

Prior to joining EAA, Mr. Macnair held the position of Vice President of Government and Technical Affairs with the Professional Aviation Maintenance Association and previously served for more than a decade as Director of Regulatory and Certification Policy for the Aircraft Owners and Pilots Association. Mr. Macnair has worked as an aircraft mechanic in general and corporate aviation, holds FAA mechanic and commercial pilot certificates, and has previously served as an on-air traffic reporter and flight instructor.

Mr. Macnair is a graduate of Embry-Riddle Aeronautical University with a Bachelor's degree in Professional Aeronautics. His background also includes professional education and experience in aviation safety program management, accident investigation, administrative law, federal rulemaking, and FAA enforcement policies and procedures. Mr. Macnair is a recognized proponent of the general aviation industry and the promotion of sport and recreational aviation.
